

What does it look like to the Supplier (Enabled)

An ENABLED supplier is one that has:-

- Registered on the Ariba Supplier Network - (as a result of being sent an Invitation to Register with Ariba - as part of our Supplier On-Boarding process)

and

- That we (Thomson Reuters) has established an (Ariba) Trading Relationship with (i.e the supplier has accepted our Ariba Trading relationship request).

The supplier could have also become Enabled (by registering on Ariba Network), using the link on a Light Enabled Purchase Order, or on the Payment Proposal notification eMail (that is sent once their invoice submitted via Ariba Network is Reconciled).

For Enabled suppliers, we are able to send our Ariba initiated Purchase Orders (POs) to the Supplier via the Ariba Network, and, where permitted* by either local law / not restricted by Thomson Reuters practice (e.g. Invoice Document Sequencing requirements), the supplier is able to 'flip' our Purchase Order into an invoice(s) and send it/ them back to us via the Ariba Network.

If the Enabled supplier is in a [country](#) where we do not (currently) permit eInvoicing - then, although they will see the [Create Invoice] button when they display their PO - they will receive an error stating [This customer does not accept this invoice based on its identified country of origin.] In this situation the supplier should send their invoice - quoting the PO number & PO line number(s) - to the Bill To address stated on the Purchase Order.

When the supplier receives our Ariba initiated Purchase Order - in the Ariba Supplier Network they see the PO like this
